

# PROJECT MANAGEMENT & CONSULTING

For us, everything revolves  
around your project success

Project management is  
our passion.

[www.pmc-austria.at](http://www.pmc-austria.at)

# OUR OFFER.

We manage the successful completion of your construction and plant projects. PM&C offers many years of experience, transparency and security.

**From project definition to commissioning – everything from a single source.**

## PM&C Consulting

### PROJECT DEVELOPMENT

We provide advice in the early phases just as you're initiating and preparing your project and also help with project development and detailed engineering. The better the preparation and planning, the better the project execution will be.

### CRISIS MANAGEMENT

**Project crisis in companies:** We get projects back on track and bring them to a successful conclusion. The rule here: the good stuff can stay. We will work together to revise or replace anything that doesn't fit.

### Banks & risk assessment:

PM&C supports banks with risk assessments so that they can quickly decide whether to finance a project or extend existing credit lines. In the worst case, however, we will recommend turning off the funding pipeline and thus prevent money and time from being invested in the wrong projects.

### Bankruptcy, trustee & project evaluation:

We also help with bankruptcies and provide trustees with 100% transparent and neutral project evaluations, exit scenarios and switchover plans.

## PM&C Project Management

Our team of experts supports the successful handling of construction and plant projects – whether it's a new project or a project that needs to be brought back on track. We support you every step of the way with detailed engineering, procurement,

fabrication and commissioning. We also provide support by preparing documentation for regulatory approvals, and support with maintenance services or revamp projects. We can also take over management of your project on an interim basis.

## Planning Tools and Document Management

Efficient project management goes hand-in-hand with efficient planning and structured document management. We provide you with a compre-

hensive planning tool, a control dashboard and a tried and tested document management system. This will save you time and money.

Consulting GmbH

## OUR PLEDGE.

*"We help you make better project decisions based on our transparent and independent project evaluation and many years of international experience.*

*Our ultimate goal is the successful completion of your project. In the event of a project crisis, we're on hand to help get your project back on track quickly. We deliver short, understandable answers instead of endless reports that never get to the point.*

*Each project is unique and we handle it individually. What drives us is solution-oriented and structured work based on realistic planning assumptions.*

*The focus is always on people. We pride ourselves on being able to offer you comprehensive project services from a single source."*

## HOW WE WORK.

The focus is always on people

Many years of experience in planning and execution

Competence in handling major international projects

Comprehensive network of cooperation partners

We treat each project individually

Simple and understandable answers

Rapid, transparent, and neutral evaluations of the project status

On-site consultant or interim management support

Everything from a single source: from detailed planning to start-up
